

NOTICE OF SYSTEM UPGRADE!

Attention Water Utility Customer:

This notice is to advise customers of a system upgrade we will be implementing in late summer of 2015. This is necessary due to our current meter heads are no longer manufactured. The new system will provide the Fulton water utility with more accurate reads, and will continuously monitor water usage, transmitting data throughout different times of the day. This transmission will enable the system to alert us should there be a leak or unusual usage at your property.

In the near future you will be receiving correspondence of when our water utility operator will need access to your property. There will be specific time frames when our utility operator is available to replace the meter head. If you are unavailable during that timeframe, a notice will be left on your door for you to contact us for an appointment. This installation is expected to take less than half an hour.

This upgrade is at no cost to the property owner/customer. If you have further questions, please contact the Fulton Town Hall @ 608-868-4103.

Thank you for your cooperation with our upgrade!
